Making connections beautifully

Designing for YOU

High quality decorative electrical wiring accessories, circuit protection, lighting controls and multi-room audio systems, designed and manufactured to meet the project demands of architects, interior designers and installers

Engineering skills, an eye for design and an obsession for quality, combined with the values of a long-established family company, Hamilton celebrates a fantastic milestone this year as the Business reaches its 50th anniversary.

Hamilton is among the leaders in British manufacturing SMEs. With a wide range of capabilities to meet the needs and exacting demands of the professionals we work with, we deliver an end-to-end range of wiring accessories and circuit protection devices, plus lighting & audio controls for homes of the discerning, hotels of distinction, heritage properties and the latest signature developments.

Beginning with the assembly of dimmers (then a new technology when we started out in the 1960s), the company has progressed through building a portfolio of designs to please the interiors fashion industry, to harnessing today's 'smart' technologies to serve the current insatiable appetite for electronic and remote control of all aspects of living.

A tailor made service

Bespoke electrical wiring accessories

Every now and then a project needs something a little different ...a special! Using our bespoke design and manufacturing service, we can create tailor-made prototypes to a highly finished standard for you to show your clients exactly how your ideas will look, and work as a custom-built electrical accessory.

Tell us what function the item is to fulfil, what style and finish you are leaning towards, and our in-house team of experts will design and manufacture a unique personalised solution that will match your exact requirements. We'll start by creating 3D CAD views, enabling your idea to take shape and be inspected from different angles and perspectives before proceeding to prototype sampling.

- In addition to our standard selection of finishes, we can provide bespoke premium finishes including PVD, in a choice of finishes such as Nickel or Antique Brass.
- Unique text or graphics can be printed on the plates by laser etching, pad printing or engraving.
- Custom-made back box assemblies to specific measurements and designs can be manufactured to suit non-standard plate configurations.

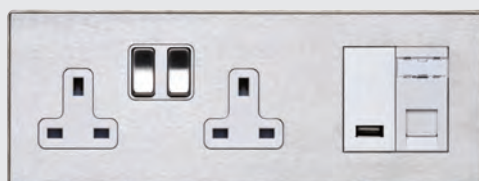

Whether it's a particular finish, specific energy-saving remit, special shape, combination of functions or any other request, Hamilton will work with you to develop a stylish and efficient solution that will exceed expectations.

Bespoke Design

Tailor made accessories

- Tailor made items of the highest standards
- Bespoke service in design and production of custom-built electrical accessories
- A unique solution to match your exact requirements

Making light work

lighting controls and dimming

Hamilton's lighting system provides simple and effective control of ambient lighting and building systems, allowing users to transform a space with light to reflect a desired mood. It is essential for creating the right atmosphere in all kinds of properties and venues, both inside and out – and can save energy too, minimising unnecessary light usage.

The Hamilton lighting system allows the user to create a series of multi-room lighting scenes which can be set, stored and recalled - all at the touch of a button. The programmable, wall-mounted controllers have four buttons that recall the set scenes, along with circuit buttons that are used to adjust the level of lighting in different areas of each room. It may also be controlled via infra-red remote control for complete ease of use.

The lighting system benefits from being one of the easiest systems of its kind to install and operate. Once wired in by a qualified electrician there is no specialist knowledge required to alter the settings, which is a major advantage as a user can reprogramme it themselves at any time with minimal effort and at no additional cost.

It is also available with DMX control for more complex LED colour washing effects and can be integrated with other products including the Hamilton multi-room audio system for an entire lighting and sound package.

Smart Lighting Control

- Set, store and recall lighting scenes
- Simple to program scene setting
- LED colour washing effects
- Range of stylish wall-mounted controllers
- LED lamp compatible*
- Expandable system beyond lighting control
- Ethernet option allows control via the Mercury App available on Android and IOS

LD 4S+4C BC-SS

LD CPT4S+4C BC-VW

74C TCH5CRN-AL

*De-rate dimmers by 75% eg. 600Watt dimmer = 150W LED

Due to the different design and component variations we recommend that when dimming mains (GU10) type LEDs compatibility is sought between dimmer and lamp prior to purchase and installation.

Making sound choices multi-room audio

Multi-room audio systems provide the versatility of controlling music played in different areas of a property; from the living areas to the bathroom, and even the garden! Installing one of these systems facilitates a new level of luxury for the homeowner, affording the flexibility of choosing which sounds they want to listen to, when and where.

With Hamilton's multi-room audio system, each room can feature user-friendly wall-mounted control plates for easy access, the music can also be managed by an infra-red remote control or a two-way WiFi device such as an iPod or iPhone, as it comes with its own official app. The wall plates are available in styles designed to complement other wiring accessories in the Hamilton ranges.

Within each system, up to four music sources can be plugged into a discreet hub and fed into up to four rooms. There are also four input options for devices such as CD players and MP3 players.

The system is quick and simple to install, with no programming required. It uses a star wired hub architecture with all of the main components centralised in a single, compact wall-mounted hub.

Smart Audio Control

- Available as a 2 and 4 zone system with 4 sources
- Play different music in different rooms or the same music everywhere.
- DAB Radio
- 20W + 20W speaker output
- Wireless bluetooth audio streaming
- Wireless control via the Smart Control App available on Android and IOS
- Range of stylish wall-mounted controllers
- Option to integrate with Hamilton lighting control systems

Contour and Convex Metal Consumer Units

- Robust metal enclosures include removable gland plates on top and bottom and knockouts to rear
- Solid metal drop down visor in a raised or flush option
- Intumescent gland adaptors for easy and safe cable entry
- Large and accessible wiring space
- Din rail support to avoid flexing
- Enclosure finished in matt white
- 2 Year product guarantee

Outdoor Power Elemento

- Robust high impact UV stable housing
- Multiple gland entry positions
- IP66 rated when in use (excluding RCD outlets)
- Lockable switched socket outlets as standard

4 Channel Wireless Switching

- Wireless 4 channel switching system
- Can be used outside to control multiple lighting circuits, pond pumps
- Each circuits is controlled wirelessly using the supplied key fob and wallplate
